Art Unit: 1746

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 5-7, 13 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tsukamoto et al. (U. S. Pat. No. 6,218,650) in view of either Ueda et al. (U. S. Pat. No. 6,040,564) or Takahashi et al. (U. S. Pat. No. 6,008,482).

Re claim 13, Tsukamoto is cited disclosing high frequency heating apparatus comprising a high frequency generating part (36) an evaporating dish (see col. 11, lines 44-57) and a control part (typical) that differs from the claim only in the recitation of the pumping means. Takahashi (as at 7, see fig. 20) and Ueda (as at 20) disclose the pump. It therefore would have been obvious to one having ordinary skill in the art to modify the device of Tsukamoto, to include a pump as taught by either Takahashi or Ueda, for the purpose of automatically providing water for evaporating. Re claim 5, Tsukamoto discloses the fan. Re claim 6 and 7, Ueda and Takahashi disclose the tank. Re claim 17, Tsukamoto the use of a detergent.

3. Claims 14-16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Claims 18 and 19 are allowed.

5. Applicant's arguments with respect to the pending claims have been considered but are moot in view of the new ground(s) of rejection.
